INTERNATIONAL PRELIMINARY REPORT **ON PATENTABILITY**

D & JAN 2006 International application No. PCT/NO2004/000218

	Day No. I	Paris of the second			
_	Box No. I	Basis of the report			
1	. With regard to the language , this report is based on the international application in the language in which it filed, unless otherwise indicated under this item.				
	which	eport is based on translations from the original language into the following language, is the language of a translation furnished for the purposes of:			
	☐ pui	ernational search (under Rules 12.3 and 23.1(b)) blication of the international application (under Rule 12.4) ernational preliminary examination (under Rules 55.2 and/or 55.3)			
2.	With regard to the elements* of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):				
	Description	ı, Pages			
	1-7	as originally filed			
	Claims, Nu	mbers			
1-7		as originally filed			
	Drawings, S	Sheets			
	1/2-2/2	as originally filed			
	□ a sequ	ence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing			
3.	☐ The an	mendments have resulted in the cancellation of:			
		description, pages claims, Nos.			
	☐ the	drawings, sheets/figs			
		sequence listing (specify): table(s) related to sequence listing (specify):			
١.	This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).				
		description, pages claims, Nos.			
		drawings, sheets/figs sequence listing (specify):			
	□ any	table(s) related to sequence listing (specify):			
	* If ite	em 4 applies, some or all of these sheets may be marked "superseded."			

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/NO2004/000218

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/NO2004/000218

Re Item V.

1.0. The following documents are referred to in this communication:

D1: WO 96/28071 A D2: US 2003/106157 A

2.0. INDEPENDENT CLAIM 1

- **2.1.** The present application does not meet the criteria of Article 33(1) PCT, because the subject matter of claim 1 does not involve an inventive step in the sense of Article 33(3)PCT.
- **2.1.1.** Document D1, which is considered to represent the most relevant state of the art to the subject matter of claim 1, discloses (the references in parenthesis applying to this document):

a frame mattress comprising a frame (1) with a spring inlay (2) surrounded by the frame, and a material (3) over the spring inlay, together with a reversible mattress (4), arranged for abutting the material (3), and a cover (5) enveloping the reversible mattress (4) and at least partly the frame (1).

2.1.2. The subject-matter of independent claim 1 differs from the disclosure of D1 in that:

the material (3) is at least partly detachable and that the spring inlay (2), constituting a principally form-stable unit, is reversibly arranged in the frame (1).

2.1.3. The problem to be solved by the present invention may therefore be regarded as how to increase accessibility and/or flexibility.

Without knowing the invention the skilled person starting from D1 would regard this problem as one of several straightforward possibilities.

2.1.4. In view of D2 the solution proposed in claim 1 of the present application cannot be considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

the feature of "the material at least partly detachable (see D2, fig. 2,4; claims 9,10, par. 37) and the spring inlay (see D2, par. 38 lines 6-8), constituting a principally form-stable unit, (suitable for being) reversibly arranged in the frame (see D2, par. 38 lines 6-8)" are described in document D2 for solving the problem of accessibility and flexibility (see Remark below and D2; fig. 2,4; par. 33, lines: 3,4; par. 37; par. 38 lines 2-7,6-8; claim 9,10).

The skilled person would therefore regard it as a normal option to include this feature in the frame mattress described in document D1 in order to solve the problem posed.

Remark: Document D2 shows two different uses of a removable cover:

- use as a cover for a top mattress (see fig. 3; par. 32)
- use as a cover for **a main mattress** (see fig. 4; par. 33, lines 3,4), said **main mattress** may be:
 - -- a reversible mattress or
 - -- a frame mattress (see fig. 4, par. 38, line 4)

Accordingly the word main mattress use in D1 refers to the frame mattress.

2.1.5. Therefore the features disclosed in D1 and D2 would be combined by the skilled person, without exercise of any inventive skills in order to solve the problem posed. The proposed solution in independent claim 1 thus cannot be considered inventive (Article 33(3) PCT).

3.0. DEPENDENT CLAIMS 2, 3, 5-7

Dependent claims 2, 3, 5-7 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect inventive step (Article 33(2) and (3) PCT).

4.0. DEPENDENT CLAIM 4

The combination of the features of dependent claim 4 is neither known from, nor rendered obvious by, the available prior art.
